Forecast for Wednesday 09 Jun 2021

Weather: A bright or sunny start in southern and some eastern parts of the Dales, but low cloud likely lingering on northern and western hilltops, with a small chance of some drizzle. More widespread sunshine developing for a while through the morning, before turning more generally cloudy again and breezier into the afternoon with the low risk of a shower. Mainly dry through the evening with a mixture of cloudier periods and sunny or clear spells.

Chance of cloud free mountain/hill tops above 600m: 40%, improving to 90% by mid-morning. Becoming 20% through the evening.

Visibility: Generally very good or excellent on lower slopes, but nearby peaks likely obscured by broken low cloud during the early daytime, especially in the north and west. Distant hills perhaps appearing hazy in any afternoon showers. Extensive low cloud likely developing on the highest elevations from mid-evening, with cloud lowering to around 500-600m at times.

Meteorologist's View

High UV levels are expected during any afternoon periods of sunshine, so sun protection is highly recommended as well as plenty of fluids given the fairly warm temperatures.

Recent rainfall: measured at Malham: altitude 375m

14:00 on Tue 08 Jun 2021	1mm	3.2mm	3.2mm

Forecast for Thursday 10 Jun 2021

Weather: Cloudy overnight and remaining fairly breezy with occasional drizzle, mainly on upslopes. Staying cloudy through much of the day in the west, with further drizzle at times. Eastern parts generally more sheltered, allowing some warm sunny spells to develop into the afternoon, with a small chance of showers.

Maximum wind: From the southwest 20mph, gusting 25-30mph.

Chance of cloud free mountain/hill tops above 600m: 20%, improving to greater than 90% from late morning (apart from western upslopes 60%). Deteriorating to 20% across the park during the evening.

Visibility: Extensive cloud overnight and in the morning with bases 400-600m. Visibilities becoming mostly excellent in the afternoon as cloud lifts, though temporarily deteriorating in any showers making nearby hills appear feint. Extensive cloud likely returning by the evening with bases 400-600m.

Temperature: **Valleys:** Plus 14 Celsius becoming Plus 20 Celsius.
At 600m: Plus 10 Celsius becoming Plus 14 Celsius.
Freezing level: Above summits.
